For Many Years
UNITED STATES
CREAM SEPARATORS

have been tested under all conditions, and have proved to thousands of satisfied users that they are the very best separators in the world. There are good reasons for their great superiority as the 1909 Model

United States Cream Separator
Has Greatly Reduced Diameter of Bowl
and still retains its great milk capacity. The currents of the milk in the separator bowl are so increased that the U. S. is unequalled by any other separator for efficient skimming, hence the U. S. separator won and holds the World's Record.
All parts of the machine are strong, simple and easy to get at. The gears being entirely enclosed are protected from dirt and dust. The whole machine is very light running and friction is reduced to a minimum because the working parts run in oil, and are accurately made and fitted. No other separator has all these advantages. The Improved U. S. is the cream separator for you to buy. See one for yourself.
